**INSTALLATION
INSTRUCTIONS**

PART NUMBER : C1010FG000

DESCRIPTION: STI SHIFT KNOB 5MT Aluminum + Leather

**APPLICABLE VEHICLE: SUBARU 5 speed Manual
(Thread diameter 12mm, Thread pitch1.25mm)**

A: KIT CONTENTS

1. Shift Knob
2. Installation Instructions

B: TOOLS REQUIRED

Clean Brush

INSTALLATION PROCEDURE

1

Disconnect the negative cable from battery and make sure parking brake is applied firmly. Gently pull shift boot down from stock shift knob. Remove original shift knob by turning counter-clockwise.

2

Remove any dust on the stalk with a clean brush and screw the Shift Knob onto the stalk until tight.

CAUTION

- Over torque screwing may cause breakage of screw thread.
- If the shift knob is excessively heated/cooled by air temperature and/or sunlight, touching it may result in a superficial burn or frostbite. When shifting under such conditions, we recommend wearing driving gloves or waiting until the shift knob reaches a suitable temperature.
