**INSTALLATION  
INSTRUCTION**

PARTS NUMBER : C1010FG310

DESCRIPTION : STI SHIFT KNOB 5MT DURACON

APPLICABLE VEHICLE : SUBARU 5 speed Manual  
(Thread diameter 12mm, Thread pitch 1.25mm)

**A : KIT CONTENTS**

1. Shift Knob
2. Installation Instructions
3. Shift Pattern Decal

**B: TOOLS REQUIRED**

- Clean Brush
- Isopropyl Alcohol
- Lint Free Cloth
- Air Blower

**INSTALLATION PROCEDURE**

1

Disconnect the negative cable from battery and make sure parking brake is applied firmly. Gently pull shift boot down from stock shift knob. Remove original shift knob by turning counter-clockwise.

2

Clean the exposed threads with a brush. Install new shift knob by turning clockwise. Clean shift knob with lint-free cloth and isopropyl alcohol. Ensure area where shift pattern decal will be placed is clean and lint-free. Use air blower if necessary.

3

Place the Shift Pattern Decal onto the knob.

4

Re-install shift boot by gently lifting it up to the base of the new shift knob until it clicks into place.

**CAUTION**

- Over-torquing may damage screw thread.
- Duracon shift knob is designed to be lightweight. Knob vibration may increase.
- If the shift knob is excessively heated or cooled, touching it may result in a superficial burn or frostbite. When shifting under such conditions, we recommend wearing driving gloves or waiting until the shift knob reaches a suitable temperature.
