

# 2014-2016 Mazda3 (WITH MAZDA CONNECT) MAZDA CONNECT DISPLAY FLICKERS ON - OFF

Some customers may complain about a MAZDA CONNECT display screen flickering on and off. This may be caused by poor terminal contact at the engine compartment ACC Relay.

## Repair Tip

1. Go to engine compartment F-01 RELAY AND FUSE BLOCK and wiggle the ACC RELAY.
2. Does the MAZDA CONNECT display screen flicker on and off?
  - a. Yes - Contact Hotline for more information. Do not attempt any repairs until speaking with Hotline.
  - b. No - This M-tip article does not apply. Proceed with normal Workshop Manual diagnosis.
