

No.: 26CSA-05

May 2026

TO: Service Locations
FROM: Powertrain Service Engineering
SUBJECT: **Use Only Detroit™ Approved Coolant for your Engine**

SUBJECT DETAIL

When servicing your engine's cooling system, it is important to make sure you are choosing a coolant that has been approved for your Detroit™ engine. Approved coolants conform to Detroit Fluids Spec (DFS) 93K217. A list of approved coolants can be found at:

<https://dtnacontent-dtna.prd.freightliner.com/content/public/dtnaportalpublic/LubricantsFuelsCoolants.html>

ISSUE

There are coolants in the marketplace that claim to meet DFS 93K217 but are not present on the approved coolant list. These coolants may contain phosphates, which can form solids when mixed with free metals that can be present because of corrosion (aluminum, iron, copper, etc.). These solids can clog a cooling system.

REQUIRED ACTION

Review the approved coolant list when selecting a coolant. The list is updated on a regular basis.

CONTACT INFORMATION

Please email the Detroit™ Customer Support Center at csc@daimlertruck.com if you have any questions.
