

PARTS ALERT

FLASH TRAINING 2026 - 9

PART PHOTOS

Some parts have stock photos available. There are not photos uploaded on every part. Dealers can see if there is a photo available by entering the part number into DC210. If there is an "*" before the word "Items" under attachments on the bottom left-hand side of the screen, dealers are able to double click on the file name to the right of that to view/upload the photo document.

The screenshot displays the DC210 - Item Stock & Order Inquiry screen. The interface includes a menu on the left, a search bar, and a main data area. A download dialog box is open, showing a link to download the file: 23602E0010.docx. The dialog box has a red circle around the download icon and a red arrow pointing to the file name. The background shows the DC210 screen with various fields and a table of items.
