Initializaion of DTE (Distance To Empty)		USA	
Service Category		Section	
Vehicle Interior		Meter/Gauge/Display	
Applicability			
2026 RAV4 HV / PHV			

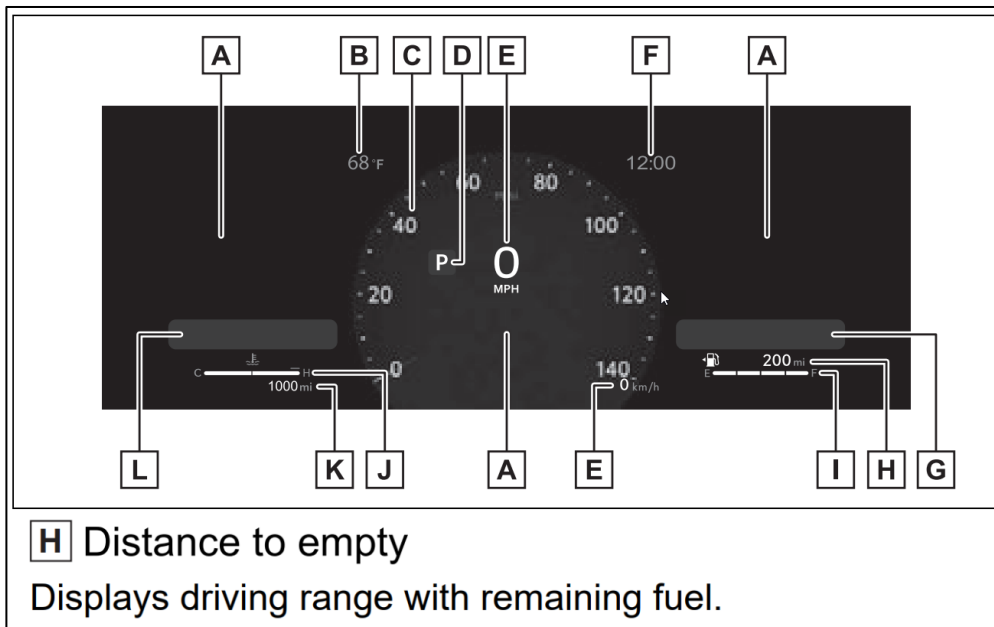

APPLICABLE VEHICLES

2026	RAV4 HV	2026	RAV4 PHV
------	---------	------	----------

CONDITION

Some 2026 RAV4 HV vehicles may display a Distance to Empty (DTE) that is higher than expected at initial fill-up. The DTE is computed using the amount of fuel remaining and a learned value that is based on the average fuel consumption.

HINT: The learned value for calculating the drivable distance can be reset.

RECOMMENDATIONS

If the DTE is higher than expected, please follow the repair manual procedure for Initialization of Drivable Distance and confirm the DTE.
