Seelevel Soul Module Configuration Guide - Tiffin GH1

Purpose: Configuration of the Seelevel Tank Sensor Soul Module on the Tiffin GH1.

Tools needed:

- PC/Laptop
- Micro USB Cable

Procedure

Open the SoulConfig App on a PC/Laptop.

Select Fresh 1

-Enabled

-Stacked (for GH1UP)

Select Grey 1

-Enabled

Select Black 1

-Disabled

*Make sure LPG is disabled, then Configure.

*Once Configured, turn off the battery disconnect to kill the power, then power back on. This will allow the module to recognize the new configuration.
