Re: **WRG-26 Solterra Battery ECU Reprogramming- VIN Status and Recall Bulletin Updates**

The purpose of this post is to communicate updates regarding the WRG-26 Battery ECU Reprogramming.

- All 2026 Solterra models with the WRG-26 recall in an “Open-Remedy not yet available” status have been updated to an “Open” status. As a result, retailers can complete the WRG-26 recall on all open vehicles.
- The WRG-26 recall bulletin has been posted on STIS. Please access the WRG-26 recall bulletin for the most up to date recall information, including repair flow chart and procedures.
- Owner notification letters will be sent in mid-August. In the meantime, if a vehicle visits a retailer for unrelated service, or should an owner contact a retailer regarding the WRG-26 recall, the retailer should perform the recall.
