## SERVICE PARTS INFORMATION

The S13 Powertrain has been tested and validated with the following silicones, thread lockers, lubricants, sealants (chemicals), and are the recommended chemicals to use to maintain performance and longevity of the powertrain.

Always reference the service manual for your powertrain and chassis.

None of the chemicals are stocked in international PDC's; there may be a direct or drop ship source (SOS code dependent), or you must locate a local supplier.

Component Fluid	Part number	Notes	Supplier
Omnifit 200 m	104007N1		Exdron / Sichel/Loctite

Loctite 620	LOC62015KK		Henkels/Loctite

Always handle and use chemicals from clean containers. Do not use containers that previously contained other types of chemicals, fluids, oils, coolants, or solutions. It is recommended to use containers that the fluids were shipped in and not to reuse containers. Reseal containers after use.

Certain chemicals have limited shelf lives; you must use them within that shelf-life window.
