APPLICABLE MODEL(S)/VINS

2024-2026 CX-90 with VINS lower than JM3KK*****368008 (produced before November 19, 2025)

DESCRIPTION

Some vehicles may exhibit a squeaking noise from the rear brake during deceleration, and the noise is particularly noticeable during braking when the brakes are cold. This is caused by the brake pad(s) having difficulty contacting evenly with the rotor surface during light braking due to wear and/or deformation of the brake pad(s). To eliminate this concern, the shape of the rear brake pads will be modified.

Customers having this concern should have their vehicle repaired using the following repair procedure.

REPAIR PROCEDURE

1. Verify the customer concern.
2. Replace both sides of the rear brake pads with the modified ones according to the instructions in MGSS (REAR BRAKE DISC PAD REMOVAL/INSTALLATION).

NOTE: Machining the rotors is unnecessary as they are not causing the noise. However, clean the rotors before installing the modified pads.

3. Verify the repair.
