50 Workshop info: booming noise or wind noise from the vehicle underbody

Release date: Jun 15, 2026

Condition

Model(s)	Year(s)	VIN Range	Vehicle Specific Equipment
Q7	2017 - 2026	All	Not applicable
Q8	2019 – 2026		
SQ7, SQ8, and RS Q8	2020 – 2026		

Customer states:

A booming or humming noise can be heard from the vehicle underbody. The noise begins at a speed of approx. 80 km/h and gets louder as the speed increases; it can also be perceived as wind noise.

Workshop findings:

The customer complaint can be reproduced. The noise is coming from the front end or the floor area. The mirrors and the doors can be ruled out as the cause.

Technical Background

A plug is missing in the area of the pick-up point (refer to Figures 1 and 2). This open hole causes a booming or whistling noise inside the vehicle.

Figure 1. Plug (part number 4M0.899.183.A) missing in area of pick-up point

Figure 2. Positions in which a plug may be missing

Production Solution

Not applicable.

Service

Not applicable.

Warranty

Not applicable.

Additional Information

All part and service references provided in this TSB (**2082366**) are subject to change and/or removal. Always check with your Parts Department and/or ETKA for the latest information and parts bulletins. Please check the Repair Manual for fasteners, bolts, nuts, and screws that require replacement during the repair.
