

Traffic Sign for Traffic Sign Assist Blinking in Instrument Cluster; with speed limit, without speed limit, or between US and European sign without obvious cause - No DTC

Topic number	LI54.71-P-079104
Version	7
Function group	54.71 - Camera and radar-assisted assistance systems
Date	7/9/26
Validity	Vehicles equipped with code option code 513 (Traffic Sign Assist).
	167, 294, 295, 296, 297, 206, 214, 223, 236, 254, 192, 232
Reason for change	Date updated for remedy.

Complaint

Traffic sign symbol for "Traffic Sign Assist" is blinking in instrument cluster without obvious cause usually with one of the following scenarios:

- Flashing without a speed limit ("- -").
- Flashing when current vehicle speed is under speed limit.
- Flashing between US speed limit symbol and European speed limit symbol.

NOTE:

- Verify that the concern falls under one of the attachment videos. If not, then it is outside of the scope of this LI.
- This also does not cover "Traffic Sign Inoperative" messages on the instrument cluster.

Attachments	
File	Description

TSA Sign Flashing.mp4	

Cause

There are two identified reasons for this concern:

1. Country code information stored incorrectly at a particular geographic latitude range.
2. Incorrect reference data when the vehicle is started and a GPS signal is not immediately available.

Remedy

Do not replace parts.

Please open a TIPS case to the Body/Chassis/Entertainment inbox but read the below carefully:

- The vehicle must be exhibiting the concern as shown in the attachment videos.
- The vehicle DOES NOT need to be at the dealer, nor does it need to be brought into the dealership.
- If the geographic location is known, it is very important that it is provided.
- Provide any pictures or videos, if available.

A new software for the head unit is scheduled for tentative release in Q3 2026.
