Grecale Driveshaft Flex Disc Characteristics

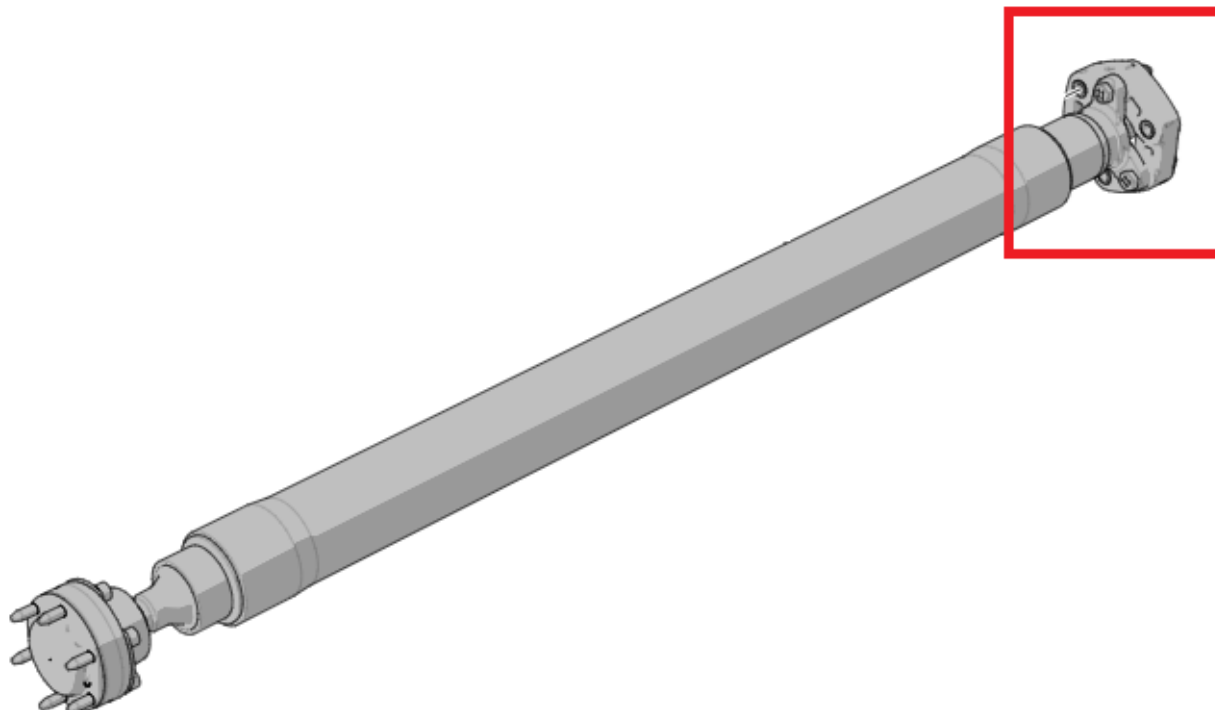

IMPORTANT NOTICE This bulletin replaces MAS004705 dated May 6, 2025. It includes updated information. Please delete all previous versions.

DATE: July 1, 2026

This Technical bulletin serves as a guide and provides info regarding wear characteristics of the driveshaft "Flex Disc" and to recognize which condition of this component is considered compliant and therefore avoid unnecessary replacements.

MODELS: Grecale M182, GranTurismo M189, GranCabrio M190 (All MY).

SECTION: 03.30 - 1 Drive shaft.

Flex Disc Characteristics

NORMAL (SURFACE CRACKS):

The appearance of cracks on the external rubber part of the Flex Disc is considered a normal condition, which may appear early, but does not degenerate and therefore does not lead to performance losses and/or impacts on safety.

NORMAL

In this case, the driveshaft does not need to be replaced.

DO NOT REMOVE THE FLEX DISC FROM THE DRIVESHAFT: the reason for this is that it is used for balancing the drive shaft.

Removal of the flex Disc from the driveshaft may lead to a situation that can only be remedied by replacing the entire drive shaft, which however will not be recognized under warranty due to improper repair.

ABNORMAL (DAMAGE)

The images below show a damaged Flex Disc, which has the following two problems:

- Deformation (ovalization).
- Exposed and/or damaged aramid fibers.

In this case, replacing the drive shaft is the only technical solution allowed.

Warranty claims must include detailed photos (with date and time stamps) of the damage, as well as any accompanying comments.

In case of replacement, complete the warranty request as follows:

Description	Code
Fault Code	063
Component Code	3.30.001 (complete drive shaft)
Operation Code ▪ Replacement	3.30.001.0

Any warranty repairs must include evidence of the steps described above, attaching them to the relevant Blue On Line request (if required by current Blue On Line Policies) or to the warranty claim, in accordance with the latest BOL and TDA policies

Thank you for your kind attention.
