Product Update to 3/24/25 announcement – New Universal Leg for Freedman Type-2 Seats (3-Point)

This notice is to inform customers about a rolling change to our existing type-2 leg systems. Please be aware of the new part numbers listed below.

Our new Universal Leg is crafted from high-strength steel, is lighter, more versatile and visually pleasing without compromising performance. The new Universal Leg for Type-2 seating **replaces** both GO and 3PT leg systems. We've observed comparable or superior performance in FMVSS 207/210 tests for the new Universal Leg vs. your current GO or 3PT legs. Test reports are available upon request.

	New U-T-2 Leg	GO Leg (Being replaced)	3PT Leg (Being replaced)
Part Number Curbside	107566	24021	14507
Part number Streetside	107567	13299	14508
Weight	6.0 lbs.	6.0 lbs.	9.3 lbs.

The new Universal Leg for Type-2 seating may be used with the following Freedman and FMS 3-point products: 3PT, Esquire, Bellagio, Caregiver, GO-ES, Palermo, and Trieste.

What does this mean to our customers?

- All new orders for type-2 seats will default to the new Universal Legs (when applicable) in late June or early July 2026.
- We will attempt to fill existing orders so that multiple unit runs do not have varying leg types.
- Replacement parts will continue to be available.
- As of today, Family 3PTA seats are not part of this change.

Benefits to you:

- The new leg system is now compatible with aluminum track flooring systems. Floor holes are on 1" increments AND have a slot to accommodate our 1.75" legacy rear holes spacing.
- 3+ lbs. weight savings from legacy 3PT legs.
- One leg for all Freedman 3-Point seats means you can swap legs if you need to.
- Easier accessibility during installation to vehicle.

Please contact your regional Freedman sales rep or customer service at (773) 524-2440 for questions about these changes.
