Product Change Notice - 10-16K Hydraulic Brake Calipers

Dear Valued Customer:

Please be advised, Lippert has updated the design for 10K–16K hydraulic disc brake axle systems.

The updated caliper replaces the previous design and includes the following changes:

- Caliper coating changed from Dacromet to a zinc coating with a powder-coated final finish.
- Caliper mounting hardware changed from steel with zinc finish to stainless steel.
- Caliper piston changed from chrome-plated steel to stainless steel.

The updated caliper is fully interchangeable with the previous version and is expected to provide improved corrosion resistance due to the updated coating and stainless steel components. No changes to fit, function, installation, or braking performance are anticipated. The change is expected to begin 9/1/2026.

Current Part Number: 2020111769
