

Subject		Market
Battery State Of Health (SOH)		USA
Service Category	Section	
Engine/Hybrid System	Hybrid/Battery Control System	
Applicability		
26MY BEVs		

APPLICABLE VEHICLES

2026	RZ550E	2026	RZ450E
2026	ES500E	2026	ES350E
2026	RZ350E		

CONDITION

State of Health (SOH): An estimate of battery health that is updated as the vehicle learns from operating and charging conditions over time.

Distance Since Last Update: Indicates the distance accumulated since the last SOH calculation. A default mileage value of 40,727 at SOH 100% may be displayed until sufficient vehicle learning is completed. Once SOH value updates from 100%, the Distance Since Last Update value will re-set to 0 miles.

Both SOH and Distance Since Last Update values will continue to update as the vehicle continues to learn.

RECOMMENDATIONS

Please **DO NOT** perform a battery utility update to reset or influence the Distance Since Last Update value. This may result in a default SOH % showing on MID and not true amount (i.e. 82.7% instead of 100%).
