

INSTRUCTION TO SERVICE

ITS61263		February 05, 2025
SECTION:	241-Fuel System	
SUBJECT:	Fuel Neck Fill Replacement (on coaches with Temco valve)	
ISSUE:	Customers are complaining of fuel splashback at high flow rates.	
SUMMARY:	Follow this procedure to replace the neck fill assembly with a new design which resolves the splashback issue.

THIS ITS DOCUMENT SHOULD BE RETAINED AND REFERRED TO FOR FUTURE MAINTENANCE UNTIL THE PARTS AND/OR SERVICE MANUAL IS UPDATED TO REFLECT WORK DONE AS A RESULT OF THIS DOCUMENT. ENSURE THAT THIS DOCUMENT IS AVAILABLE FOR PARTS AND MAINTENANCE STAFF GOING FORWARD.

PROCEDURE:

1. Set park brake and chock wheels.
2. Turn the main battery disconnect switch to the "OFF" position.
3. Open the fuel tank access door and remove the two bolts securing the fuel door. Save the bolts for later use.

4. Open the DEF access door and remove the two bolts securing the fuel door. Save the bolts for later use.

5. Remove and set the fuel door aside.

6. Disconnect the fuel return line to fuel tank.

7. Remove and save the ten bolts and lock washers securing the fill neck assembly.

8. Remove the return hose from the bottom of the filler neck.

NOTE: Secure the tube and fitting so it doesn't slip into the tank.

9. Remove and save the neck fill assembly and discard the neck fill gasket.

10. Remove and save the hardware securing the filler cap, elbow fitting, safety valve and relief valve. Save the nozzle. Discard the gasket and rest of the neck fill assembly.

11. Use thread fitting sealant for the next few steps wherever there are thread fittings.

12. Install the fuel return line bushing and 45 degree elbow to the new neck fill gasket assembly, 1050921, as shown.

13. Place the new neck fill gasket on the fuel tank, MCI P/N: 09-06-2328, and re-install neck fill assembly using existing bolts and lock washers.

14. Torque the bolts to 65-70 In-Lb in cross sequence procedure as shown below.

15. Install safety valve, 09-06-6151, to the fill assembly as shown below and apply Teflon tape to seal.

16. Install relief valve, 09-06-1708, to the fill assembly as shown below and apply Teflon tape to seal.

17. Install existing elbow fitting to the fill assembly as shown below.

18. Install vent hoses, 09-06-2484, to both the safety and relief valves using uniclamps, 954341. Secure the hoses using tyrap, 5958112.

⚠ **NOTE:** Torquing bolt #2 can be tricky. Tighten it as much as possible.

19. Install the filler cap to the new neck fill gasket assembly, 1050921, using new gasket, 09-06-1709. Torque the bolts to 88-92 In-Lbs.

20. Re-install the return line to fuel tank. Torque the fittings to 83 Ft-Lb.

21. Re-install the fuel door to the coach frame by installing the two existing bolts from the fuel tank access door.

22. Secure the fuel door by installing the two existing bolts from the DEF access door.

23. Check the coolant level in the surge tank and top-off, if needed.

24. Turn on coach ignition.
25. Push and hold the fuel pump switch in the RH service compartment for at least one minute to ensure no air bubbles in the fuel filter

Hold the switch for at least one minute

26. Re-torque the bolts on fuel tank neck fill, ground PFT wire, fuel tank sensors, and street-side funnel assembly to their respective torque values after 24 hours from initial torque application.
