**DATE:** November 2016

**SUBJECT:** 2014-2016 Mazda3 Fuel Leakage from Inlet Check Valve  
Safety and Emission Recall 0116I

Mazda Motor Corporation has decided that a defect which relates to motor vehicle safety exists in certain 2014-2016 Mazda3 vehicles produced from December 4, 2013 through September 18, 2015.

On certain Mazda3 vehicles, due to possible fuel tank deformation during manufacturing, the inlet check valve may not be properly welded to the fuel tank. If this weld breaks during vehicle operation, fuel leakage may occur, increasing the risk of fire.

Dealers must inspect the fuel tank on the subject vehicles and, if necessary, replace it with a new, improved one. Please refer to the Repair Procedure document for details. **Fuel tank kit orders are VIN specific and therefore not eligible for a 45-day or accrual return.**

Owners of affected vehicles will be notified by first class mail beginning November 17, 2016.
