Affected Models/Years:	Affected Population:	Dealer Inventory:	SERVICE COMM Activation date:
MY13-15 Altima	846,009	2,105	January 22, 2016

The purpose of this update is to provide parts shipment information.

******* Parts Information *******

An order form is not available at this time. Nissan has developed an automatic parts shipment plan to ensure an adequate supply of parts is available to all Nissan dealers.

The Nissan Auctions have selected dealers to perform campaign repairs on units awaiting to be sold. Nissan has begun allocating additional inventory to these dealers in this week's shipment to begin repairing these vehicles. Please schedule repairs in accordance with parts availability at your location. Nissan will continue shipping additional parts allocations.

Dealers receiving parts for Hertz and Avis/Budget will continue to be contacted directly by Nissan to communicate how many parts have been allocated for each rental company. Rental companies are distributing parts directly to their service centers.

Note: Shipments to Enterprise have been completed and Enterprise will now work with dealers to repair the 2,500 vehicles they have remaining. Dealers should schedule these repairs at their discretion.

- The **fifth automatic shipment** of 65601-9HP0D parts will begin shipping on **Thursday, February 25th, 2016**. 65601-9HP1D parts will begin shipping **Friday, February 26th, 2016**.
 - Please see the attached Automatic Parts Shipment list for details
- Nissan parts shipments received this week were less than expected. As a result:
 - Dealers serviced by PDC 14 have no shipments at this time
 - Dealers with sufficient inventory were not allocated parts in this shipment
- We will continue to monitor PDC inventory and ship to dealers that did not receive allocations this week as soon as we are able.
- The next automatic shipment is scheduled to begin arriving at dealers on **Friday, March 4th, 2016**.
 - Details for the March 4th shipment and any future shipments will be the topic of another announcement.
