**Subject: Safety Recall 20Y6 – Suction Pump
Certain 2015-2016 Model Year Volkswagen Golf, GTI & Golf SportWagen Vehicles**

Dear Volkswagen Owner,

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Volkswagen has decided that a defect, which relates to motor vehicle safety, exists in certain 2015-2016 model year Volkswagen Golf, GTI & Golf SportWagen vehicles. Our records show that you are the owner of a vehicle affected by this action.

What is the issue? The suction pump inside the fuel tank designed to purge fuel from the evaporative emissions (EVAP) system may have been damaged during assembly. This could cause fuel to flow directly into the EVAP system which could, over time, accumulate and cause a leak through the charcoal canister filter element. Leaking fuel, in the presence of an ignition source, may result in a fire.

What will we do? To help correct this defect, your authorized Volkswagen dealer will replace the suction pump inside the fuel tank. This work will take less than two hours to complete and will be performed for you free of charge.

What should you do? Please contact your authorized Volkswagen dealer without delay to schedule this recall repair. For your convenience, you can also visit www.vw.com and click on the "Owners" link to locate a dealer near you and schedule this service online.

Precautions you should take If you smell fuel in the vehicle, immediately contact the nearest authorized Volkswagen dealer to have the vehicle inspected.

Additionally, you may experience refueling issues (early stopping of the fuel nozzle and fuel spillback) when fuel accumulates in the EVAP system. If this happens, immediately contact the nearest authorized Volkswagen dealer to have the vehicle inspected.
