ST225/75R15 10PR  
Pattern TR643  
DOT 2VMC 0517, 2VMC 0617

How to identify specific tires and the mold in which they were produced

ST225/75R15 10PR Pattern TR643  
DOT 2VMC 0517, 2VMC 0617

- The identified tire size and pattern with DOT 2VMC and date codes 0517 and 0617 potentially have an issue which occurred during the curing process with one specific mold, number 13HM.
- DOT numbers and Production Dates can be found molded into the tire on one side below the Triangle brand name close to the bead location (picture showing the location attached).
- The mold number 13HM can be found molded into the tire in the center of the tire specification information. This specification information can be found close to the bead between the tread pattern and the word "Radial" which are both molded into the sidewall during the curing process (picture showing the location attached).
- Customers are instructed to review all current product in stock in order to identify tires with DOT 2VMC, date codes 0517 and 0617 with a mold number 13HM based upon the information provided of how to identify the subject tires.
- All tires with the subject DOT codes, dates and mold number should be quarantined and held for instruction on disposition. All subject tires will be replaced free of charge.
