

SAFETY RECALL NOTICE STOP SALE COMMUNICATION

Date: September 29, 2017

To: All U.S. Maserati Dealers
Subject: Safety Recall 359 - 2015, 2016 and 2017 Maserati Quattroporte GTS vehicles, equipped with the V8 3.8 liter engine.

Effective immediately, the vehicles listed on the attachment must not be delivered to customers. The subject vehicles are included in a safety recall related to the low pressure fuel pump resistor that could potentially fail when the operative current reaches the maximum allowed by the resistor; in that case the resistor failure comes as a result of cycle time/temperature fatigue. If the resistor fails, the low pressure pump will stop working due to an open circuit (resistor failure) and without the fuel pump working the engine losses power and eventually stalls, which can cause a vehicle crash without warning.

Vehicles in the attachment must have the fuel pump resistor replaced before delivery to customers. The parts for these vehicles will be available during the month of October 2017.

The remaining Maserati Quattroporte GTS on customer hands will be recalled within the next few months. Maserati intends to notify owners on or before November 13, 2017 to schedule appointments to have their vehicles fixed.

Please be reminded that it is a violation of Federal law for you to deliver a new motor vehicle covered by this notification under a sale or lease until the defect is remedied. Violation of this requirement could result in a civil penalty of up to \$21,000 per vehicle. You must correct any affected vehicle in your new vehicle inventory before delivering it.

Thank you very much for your support.

Maserati North America Inc.
Technical Operations Team
