We are reaching out to inform you that there is a potential recall of the fire extinguisher in your camper. Walter Kidde (fire extinguisher manufacturer) issued a recall on 11/2/17, stating that the fire extinguisher can become clogged and fail to activate during a fire emergency. [The fire extinguisher model number affected by this recall is 210D.](#)

We advise that you check your unit to see if you have one of these fire extinguishers. It only applies to units built from this 03/01/2017 through 11/17/2017. **if your unit has one of these fire extinguishers, reach out to Walter Kidde at 855-271-0773 or visit their website at www.kidde.com and they will replace the fire extinguisher for free.**

If you have any additional questions, please feel free to contact us.

 And they'll replace many of their fire extinguishers as far back as the 1990s. When you enter your model# on their website, they'll let you know if it's one of the recalled models. They send out the new one with a return shipping label for the old one.
