January 15, 2018

**IMPORTANT SAFETY RECALL**

This notice applies to your vehicle: [REDACTED]

T1 P1 00000030

Dear [REDACTED]:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Following a November 2017 recall announced by Kidde, Cruiser has decided that a defect which relates to motor vehicle safety exists in certain 2003 thru 2018 Model Year Cruiser recreational vehicles. As a result, Cruiser is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

**REASON FOR THIS RECALL**

The vehicles subject to this recall may have an affected Kidde portable fire extinguisher installed in them. Kidde has determined that certain fire extinguishers can become clogged or require excessive force to activate, posing a risk of failure to discharge. In addition, the nozzle can detach with enough force to pose an impact hazard. In the event that the fire extinguisher does not operate properly, injury or fatality may result.

Two models of Kidde fire extinguishers are impacted by this recall:

1. Fire Extinguishers with Plastic Handles:

2. Pindicator/Push Button Fire Extinguishers:

If the fire extinguisher experiences one of the conditions described above, it may not function properly, creating an increased risk of injury in the event of a fire.
