|---|---|
| What is the issue? | If your vehicle is involved in a crash, deployment of the front seatbelt pretensioners may cause a fire inside the driver or passenger side B-pillar trim (the outboard floor area next to the front seats) in the vehicle passenger compartment. |
| What is the risk? | A fire in the B-pillar area may spread within the vehicle and increase the risk of injury. You may notice odor and/or smoke as the fire develops. |
| What will Ford and your dealer do? | Ford Motor Company has authorized your dealer to modify the B-pillar insulation, remove electrical harness tape remnants, and apply shielding to the carpet insulation and loadspace trim panel (on Regular Cab vehicles only) free of charge (parts and labor). |
| How long will it take? | The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time. |
| What should you do? | Please call your dealer without delay and request a service date for Recall 18S27. Provide the dealer with your VIN, which is printed near your name at the beginning of this letter.
If you do not already have a servicing dealer, you can access www.Fordowner.com for dealer addresses, maps, and driving instructions. |
