

Takata Recall	When will a bulletin be distributed regarding the final phase of the Takata recall including the repair payment process and impacted VINs?	JLRNA uploaded the service bulletins to Infotrail and JBN that notify retailers of the new recalls and at that time we are required to flag all affected VINs in DDW. The timing of recall announcements is governed by NHTSA and impacts the final repair bulletin. In the meantime the repair can be performed today as the parts and process are the same as the earlier phases which have repair bulletins published. Please refer to J069 or J070 bulletins for parts and instructions on Jaguar. However until the complete new recall bulletins, which we are targeting week of February 9 th , are published with the warranty option codes, it is not possible to submit warranty claims.
