MCI Service Bulletin 463

Attention Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act and the Canadian Motor Vehicle Safety Act.

Motor Coach Industries, Inc. is sending this initial notification letter advising of a safety related defect with respect to the rear, left hand side window on certain model year 2018 MCI J4500 coaches. The window is mounted using adhesive and a secondary retention system using fasteners that are glued to the window. If the adhesive is not applied correctly, and the secondary fasteners are over torqued or not glued properly to the window glazing, the window may become separated from the vehicle. Separation of the rear side window from the vehicle, particularly while the vehicle is being driven, increases the risk of a crash or injury.

MCI is conducting a recall to repair the affected vehicles. MCI is still finalizing the details regarding the repairs, which will be provided at no cost to you, and will be the subject of a subsequent communication to you.

MCI records indicate that you are the owner or operator of the following vehicle(s) included in this recall:
