Subject:
Ducati Motorcycle: 2018 Panigale V4, Panigale V4S, and Panigale V4 Speciale

Dealer Bulletin: SRV-RCL-18-002

Dear Dealership Management,

Ducati North America has identified a safety issue with the fuel tank on certain 2018 Panigale V4 models.

What is wrong?

All bike models indicated above could feature a **fuel leak from the tank plug** when opening it and/or from the **tank filling/compensating valve cap**. The associated recall bulletin describes the two operations to be performed to avoid the issue; therefore, it is **essential** that **both** described procedures are performed at the same time.

What will Ducati do?

To correct this condition, Ducati North America will provide the parts required to refit the fuel ventilation system on Panigale V4 motorcycles. This includes an update to the fuel filling cap ventilation breather, and also a new tank filling/compensating valve and associated O-ring.

For all units that have already been retailed, affected customers will receive a letter directing them back to your dealership to perform the rework. Please see SRV-RCL-18-002 for details.

If you have any questions regarding this process, please contact Ducati North America Customer Care at: 1 (888) 391-5446.
