

New Safety Recall Advanced Communication – U86

FCA US LLC (FCA US) has announced a safety recall on certain 2018 model year (JC) Dodge Journey, 2018 and 2019 model year (RT) Dodge Caravan, 2018 and 2019 model year (MP) Jeep® Compass, and 2019 model year (KL) Jeep® Cherokee vehicles.

IMPORTANT: Some of the involved vehicles may be in dealer new vehicle inventory. Federal law requires you to complete this recall service on these vehicles before retail delivery. Violation of this requirement by a dealer could result in a civil penalty of up to \$21,000 per vehicle. Involved vehicles can be determined by using the VIP inquiry process.

REASON FOR THIS SAFETY RECALL

Some of the above vehicles may have been built with rear brake calipers that may have out-of-specification chrome coating on the pistons, which may cause gas pockets to form in the brake system. In some instances, the brake pedal may exhibit increased travel and/or feel soft after vehicle start. Gas pockets in the brake system may result in a reduction in rear brake performance, which can cause a vehicle crash without prior warning.

SERVICE ACTION

FCA US will conduct a voluntary safety recall to bleed the entire brake system to remove any gas pockets. Dealers will be notified of the launch of this safety recall by way of established communication methods. This recall is estimated to launch in 3rd Quarter of 2018.

We ask that you please take the time to ensure that your personnel are aware of this communication and are prepared to execute a customer friendly process for inquiries regarding involved vehicles.
