Subaru Recall WTV-81 NHTSA ID 18V-626 November 2018 – Interim Notice

Dear Subaru Owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

SUBARU OF AMERICA, INC. has decided that a defect, which relates to motor vehicle safety, exists in certain 2010-2014 model year Legacy and Outback vehicles equipped with a manual transmission (M/T). These vehicles are also equipped with an electronic parking brake, which is operated by pushing or pulling the parking brake switch. You received this notice because our records indicate that you currently own one of these vehicles.

REASON FOR THIS RECALL

Due to improper manufacturing processes, a capacitor on the circuit board and/or the actuator stroke sensor magnetic ring located in the control unit of the electronic parking brake (EPB) may crack over time. If either component develops a crack, the brake system warning lamp will flash, and the EPB may not apply as intended.

If the manual transmission (M/T) shift lever is not in the recommended gear when the vehicle is parked and the EPB does not engage, the vehicle may roll away, increasing the risk of a crash.

Remedy parts are not yet available.

Subaru is in the process of acquiring the parts necessary to perform this repair. Once there is a sufficient supply of parts available, Subaru will contact you again by mail advising you to proceed with scheduling an appointment with your Subaru retailer (dealer). We expect parts to be available in the second quarter of 2019.

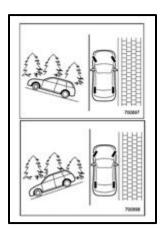

PRECAUTIONS TO TAKE UNTIL THE REPAIR CAN BE PERFORMED

Until this repair can be performed, please do the following when parking your vehicle:

- Whenever possible, park your vehicle in a flat location.
- When parking <u>uphill</u>, the front wheels should be turned away from the curb as shown. Also, be sure to shift the M/T shifter into <u>first gear</u> when parking uphill.
- When parking <u>downhill</u>, the front wheels should be turned into the curb as shown. Also, be sure to shift the M/T shift lever into <u>reverse</u> gear when parking your vehicle downhill.
- Apply the electronic parking brake (EPB) by depressing the brake pedal and pressing the parking brake switch firmly

To release the EPB, pull the parking brake switch toward you while the ignition switch is in the "ON" position with both the brake pedal and clutch pedal depressed.

However, the brake system warning light <u>flashes</u> when the EPB system is malfunctioning. If the brake system warning light flashes, park your vehicle in a safe location as soon as possible, taking the above precautions, and contact your Subaru retailer.

WHAT SUBARU WILL DO

When remedy parts are available, Subaru will replace the electronic parking brake (EPB) actuator in your vehicle at no cost to you. Subaru will notify you again by mail when remedy parts are available, advising you to proceed with scheduling an appointment with your Subaru retailer.

CHANGED YOUR ADDRESS OR SOLD YOUR SUBARU?
