Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in the vehicles listed above. As a result, Keystone RV is conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for
this recall***

It has been decided that the vehicles in the recall population may have a quick disconnect rubber propane line that is incorrectly routed allowing the grill to be stored with the fuel source on. The grill can be stored while the flame is still lit; storing the grill while the flame is lit can lead to an increased risk of fire and/or property damage.

***What we
will do***

Keystone representatives have been in contact with the staff at your selling dealership regarding this situation. The remedy is to replace the quick disconnect rubber propane line and route it in a manner in which it must be disconnected before stowing the grill. The service and parts required for this corrective action will be provided at no charge to you.

do***

As soon as possible, please make an appointment to have your RV serviced by your dealership. The labor time to perform this correction is approximately 1 hour. Please ask your dealer if you wish to know how much additional time will be needed to schedule and process your RV for this repair.
