NHTSA RECALL 18V-915

Dear Nissan Altima owner:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act. Nissan has decided that a defect which relates to motor vehicle safety, exists in certain Model Year 2015-2017 Nissan Altima vehicles. Our records indicate you own or lease a Nissan vehicle subject to this recall as identified by the Vehicle Identification Number (VIN) on the inside of this notice.

Reason for Recall

The latch lock cable for the rear passenger doors on your vehicle may have been routed improperly during trim panel installation. This installation issue could cause the rear passenger doors to unlatch and open when the rear power windows are lowered. If this occurs while the vehicle is in motion, it could increase the risk of injury to the rear passengers.

What Nissan Will Do

Your Nissan dealer will modify the door sealing screen to remedy the installation issue. If necessary, the door latch lock assembly, the assembly and sealing screen will be replaced. This repair could take less than one (1) hour to complete and will be free of charge. However, if the entire latch lock cable assembly needs to be replaced, the repair can take up to one (1) hour. Your dealer may require your vehicle for a longer period of time based upon their work schedule.

What You Should Do Qué Debes Hacer

Contact any Nissan dealer at your earliest convenience to have your vehicle remedied. Please bring this notice with you to your service appointment. **In the interim, we recommend activating the child safety rear door lock (Pages 3-6 and 3-7 in the Owner's Manual) until your vehicle has been remedied.**
