Dave Esposito  
Director of Corporate M&R  
Direct Chassis Link Inc.

**Subject: Recall Notice**

Dear Dave,

Hercules Enterprises have been notified by AXN (notification letter attached) about possible error of the Stemco Pro Torq spindle nut installation on axles which was used on recent DCLI chassis production. Attaching possibly affected chassis unit numbers and VIN numbers. We are obligated to advise you that selling or leasing these chassis with potentially affected axles before they have been inspected, cleared, and remedied if necessary, could be a violation of federal law.

Sincerely,

Simas Baliukonis  
Engineer  
Hercules Enterprises
