

**Retail Instructions to INSPECT THE STEERING SHAFT BOLT**

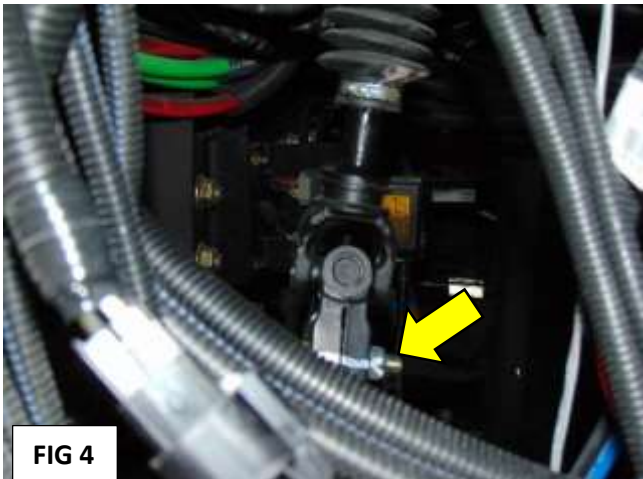

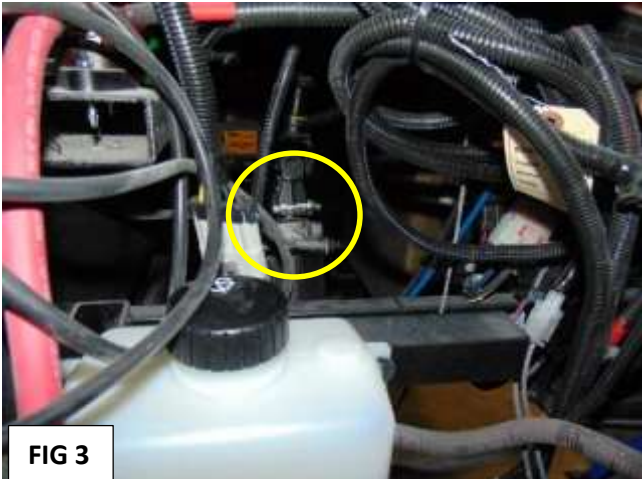

**FIG 1:**

- Turn the ignition ON (the engine does not need to be running)
- Make sure there is an unobstructed area 3 feet in front of the motorhome.
- Open the generator compartment using the switch (arrow) inside the driver side front electrical compartment. Press and hold the switch until compartment is fully extended.

**FIG 2:**

- The steering shaft bolt is located on the right side of the generator behind the washer fluid bottle (arrow).

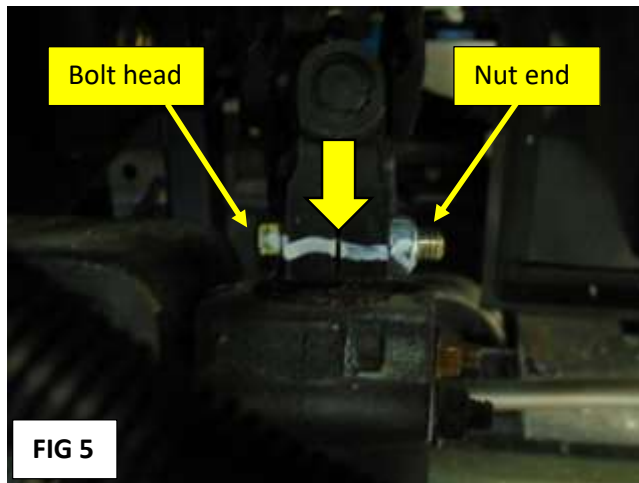

**FIG 3:**

- Bolt location is circled in this photo.

**FIG 4:**

- Arrow is pointing to the Steering Shaft bolt.
- Wiring harnesses may have to be moved aside to see it.

**FIG 5:**

- If there is a white line running from the bolt head to the nut as shown in the photo (large arrow), **the bolt has been torqued to the proper spec and no further action is necessary.**
- Close the generator compartment using the switch shown in Fig 1.
- Ignition must be ON to close the compartment (engine does not need to be running).
- Hold the switch, until the compartment closes completely.
- Turn ignition OFF.
- Complete Reply Form and return to Jayco Compliance.

**IF WHITE LINE IS NOT PRESENT – THE BOLT WAS NOT TORQUED PROPERLY.**  
**PROCEED TO THE NEXT STEP BEFORE YOU DRIVE YOUR MOTORHOME**

**CAUTION IS REQUIRED**

The bolt threads visible in Fig 5, must be at least two threads past the nut for the locking feature to be engaged to ensure your safety to travel to a Dealer to have the bolt properly torqued at 55 ft. lbs.

If there are less than two threads showing past the nut, you must tighten with a 5/8" wrench on the bolt side / 11/16" on the nut size, till at least two threads are past the nut. **This must be completed prior to moving your motorhome.**

- Close the generator compartment using the switch shown in Fig 1.
- Ignition must be ON to close the compartment (engine does not need to be running).
- Hold the switch, until the compartment closes completely.
- Turn ignition OFF.
- Complete Reply Form and return to Jayco Compliance.
- Contact Dealer for Service appointment for the Recall Remedy.
