## **AMENDED DEFECT INFORMATION REPORT (19V-627)**

This supplements Toyota's Part 573 Report (19V-627) concerning the front passenger air bag assembly issue on certain Toyota and Pontiac Vibe vehicles.

The subject recall only affects certain Toyota and Pontiac vehicles equipped with specific Takata front passenger air bag assemblies which contain an alternative air bag inflator produced by a different supplier and that were used as a replacement under a prior recall. After the Amended DIR filing on December 13, 2019, Toyota has developed effective methods to replace only the affected sub-components of the air bag assembly. Thus, Toyota is supplementing its Part 573 Report (19V-627) to include the option, where applicable, for replacement of only the front passenger airbag sub-assembly.

The Description of Corrective Repair Action is revised as noted below:

Description of Corrective Repair Action:

Dealers will replace the front passenger airbag assembly or the front passenger airbag sub-assembly with an improved one.
