IMPORTANT SAFETY RECALL

Seat Belt Buckle

Dear [Name],

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

FCA US has decided that a defect, which relates to motor vehicle safety, exists in certain Right Hand Drive (RHD) [2011 - 2018 Model Year (JK) Jeep® Wrangler] vehicles.

WHY DOES MY VEHICLE NEED REPAIRS?

The driver side seat belt on your vehicle ^[1] built for rural mail carriers may experience fatigue loading of the seat belt buckle which could lead to its mounting strap fracturing and separating from the seat cushion frame. **A seat belt buckle mounting strap that separates from the seat frame results in the seat belt system being inoperative, which may increase the risk of injury and/or injury severity to the driver in a vehicle crash.**

HOW DO I RESOLVE THIS IMPORTANT SAFETY ISSUE?

The remedy for this condition is not currently available. We are making every effort to finalize the remedy as quickly as possible, and will service your vehicle free of charge (parts and labor).

FCA US will contact you again, by mail, with a follow-up recall notice when the remedy is available. Once you receive your follow-up notice, simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment ^[2]. Additional options for your next steps are included on the left side of this notification. We appreciate your patience.

WHAT IF I ALREADY PAID TO HAVE THIS REPAIR COMPLETED?

If you have already experienced this specific condition and have paid to have it repaired, you may visit www.fcarecallreimbursement.com to submit your reimbursement request online ^[3]. Once we receive and verify the required documents, reimbursement will be sent to you within 60 days. If you have had previous repairs performed and/or already received reimbursement, you may still need to have the recall repair performed.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
