RE: Recall 19V-871 Completion

On December 9, 2019, Proterra Inc determined that a potential defect relating to motor vehicle safety existed in the body controller software that disabled the audible and visual warnings that the brake interlock could be engaged in certain 2019 Proterra Catalyst vehicles. Proterra filed a report in accordance with 49 CFR Part 573 on December 9, 2019. Proterra is furnishing notification to the National Highway Traffic Safety Administration that 100% of the vehicles identified as part of this recall have been remedied as of January 16, 2020 and no owner notification will go out for this recall.

Sincerely,

Les Seagraves  
Regulatory Compliance Counsel  
Proterra Inc
