The reason for this recall:

Polaris Slingshot has decided that a defect, which relates to motor vehicle safety, exists in certain 2019 vehicles built from 2/12/2019 through 7/31/2019 that may have 10A circuit breakers that do not meet quality standards. Affected circuit breakers do not meet functional specifications and may cause an engine to unexpectedly stop running, increasing the risk of a crash.

What you should do:

Contact your authorized Polaris dealer to schedule an appointment to have the repairs performed. Do not attempt repairs yourself. Repairs must be done only by an authorized Polaris dealer. This repair should take approximately 15 minutes. When making contact with your dealer, discuss parts availability, their schedule and how long they will need to keep your vehicle.

What your dealership will do:

To address this concern, Polaris is instructing dealers to replace the 10A circuit breakers installed in affected vehicles. This work will be performed by your dealer at no cost to you.
