Dear General Motors Customer:

This notice is sent to you in accordance with the National Traffic and Motor Vehicle Safety Act.

General Motors has decided that a defect which relates to motor vehicle safety exists in certain 2014 – 2015 model-year Cadillac CTS-V Sport vehicles equipped with 3.6L Twin Turbo V6 engine. As a result, GM is conducting a safety recall. We apologize for this inconvenience. However, we are concerned about your safety and continued satisfaction with our products.

## IMPORTANT

Your vehicle is involved in GM safety recall N192279370.

Why is your vehicle being recalled?

Over time under very aggressive driving conditions, certain roll pins in the rear-axle differential in these vehicles may fatigue. If the pins become too weak, they may fracture, which may cause the differential to lock up. If the condition occurs while driving, the rear wheels may lock up. This may affect the driver's ability to control the vehicle, increasing the risk of a crash.

What will we do?

Parts to repair your vehicle are not currently available, but when parts are available, your GM dealer will replace the rear axle differential. This service will be performed for you at **no charge**.

We are working as quickly as possible to correct this condition. When parts are available, we will send you another letter asking you to take your vehicle to your GM dealer to have your vehicle serviced. You can also check the status of this recall at: <a href="https://my.gm.com/recalls">https://my.gm.com/recalls</a>. If you have already paid for repairs for this condition, you may submit those charges using the reimbursement request form that will be provided with the next letter.

## Do you have questions?
