ballt@keystonerv.com

Dear Tabatha

Keystone RV Company has decided that a defect which relates to motor vehicle safety exists in certain model 2020 Keystone Bullet Travel Trailers. As a result, Keystone RV is conducting a safety recall.

Reason for This Recall

It has been decided that the vehicles in the recall population did not have an egress window installed in the main living area. If an emergency situation arises the occupants of the vehicle would not have a secondary emergency exit other than the entrance door, which could result in an increased risk of personal injury. The remedy is to replace the existing crank open vent window with an egress window. The vehicles included in the recall are:

2020 Bullet Travel Trailers: Model 34RI**Serial Number Range: LD433231 - LD434352*****VINs in Your Inventory***

Our records indicate unit(s) sold or in your present lot inventory fall within this range, which will require immediate preventative action. Important: If some of the units are still in your inventory, Federal Law requires you to complete the recall service on those units before retail delivery.

Please log-in to Key Express for your list of VINs in campaign # 20-373.

Advisory Instructions

Claims for the units which have been serviced must be submitted. Claims submitted will be used by Keystone to record recall service completions and provide dealer payments. Please [click here for a copy of the Safety Advisory 20-373](#) which details how to remedy the situation and the proper reimbursement procedures.

We apologize for any inconvenience this situation may cause and greatly appreciate your cooperation. Should you have any questions or concerns regarding this correspondence or the Safety Advisory, please feel free to contact us.

Sincerely,

KEYSTONE RV COMPANY
