Dear Service Manager,

In the course of continuous product monitoring and quality checks, Automobili Lamborghini S.p.A. has determined that, during the assembly process, the bowden cable pin inside the internal door handles may have not been correctly engaged on some vehicles produced between December 2019 and January 2020.

Over time the internal door handle mechanism may fail and the door may not be unlocked from the inside, posing an entrapment risk. This failure could lead to the inability to operate the handles from inside the vehicle with a safety risk in case of emergency. The outside handles operation is guaranteed by a different component and its functionality is not affected.

For safety reasons, these internal door handles must therefore be replaced.

The instructions for upgrading the vehicles will be available on the Lamborghini HUB at the page “Service and Recall Campaigns” from May 1st.

In order to support you in answering at the best to your customers, we are attaching the FAQ (Frequent Asked Question) you must conform to.

Capitale Sociale
€ 130.000.000
