Dear Mercedes-Benz Owner:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Mercedes-Benz AG (“MBAG”), the manufacturer of Mercedes-Benz vehicles, has decided that a defect which relates to motor vehicle safety exists in certain Model Year (“MY”) 2018-2019 S-Class vehicles. Our records indicate that your vehicle is included in the affected population of vehicles.

What is the CONCERN?

On certain Model Year MY 2018-2019 S-Class Sedan and S-Class Coupe/Convertible vehicles equipped with the 4.0L 8-cylinder gasoline-engines (M176), the material used for two engine oil plugs might not withstand the high engine loads during driving. Under dynamic driving conditions, engine oil could leak from the plugs onto the roadway and create a road hazard, increasing the risk of a crash for other road users. Additionally, if the engine oil level were to fall below a certain limit, the driver would be made aware by a red warning message in the instrument cluster. If the vehicle is driven after the warning message appears, the engine could run without the required oil, damaging the engine. This could lead to a vehicle stall and increase the risk of a crash.

What will your DEALER DO?

An authorized Mercedes-Benz Dealer will reinforce the engine oil plugs by adding a retaining plate on the affected vehicles. **This service will be provided free of charge.** We are dedicated to always delivering the best customer experience, and respect for your time is a top priority. While the minimum repair time can be less than 1 hour, your dealer can provide you with a better estimate of the overall time for this service visit. As a matter of normal service process, an authorized Mercedes-Benz dealer will also check for other repair measures which might be applicable to your vehicle which may increase the required working time.
