Date: May 27, 2020

Issue: The vehicle may leak transmission fluid due to a possibly insufficient friction weld connection between the transmission oil pipe and the flange. If a transmission fluid leak occurs while driving, the road may become slippery for the following traffic, which may increase the risk of a crash.

Precautions: A loss of transmission fluid as a result of a poor weld connection may be recognized by oil marks on the ground beneath the vehicle. A warning lamp indicating a fluid loss also comes on once a certain volume of fluid is lost.

- Repair:**
