Dear «Owner\_name»:

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Thor Motor Coach (TMC) has decided that a safety defect exists in certain TMC motorhomes based upon notification by Ford Motor Company that a defect which relates to motor vehicle safety exists in certain Ford chassis that were used to manufacture your TMC motorhome. Ford was issued recall 20V-175 by the National Highway and Safety Administration (NHTSA) to remedy this defect. Ford’s recall number is 20S13. To assist Ford and NHTSA in identifying the final vehicles manufactured, TMC is also conducting a safety recall. We apologize for any inconvenience this action may cause you; however your safety and continued satisfaction are of the utmost importance to us.

***Reason for this recall***

It has been decided that on certain TMC motorhomes subject to this recall campaign, there may be insufficient clearance between a wiring harness bundle and the vehicle’s frame. Insufficient clearance could lead to a touch condition between the wiring harness bundle and the vehicle’s frame. Over time, this could damage the wiring harness bundle potentially resulting in an engine stall or limited anti-lock braking and roll stability control system functionality, increasing the risk of a crash.

***What we will do***

TMC has included in this mailing the recall notification letter from Ford. Ford will be handling the repair of your vehicle at an authorized Ford dealer. The repair will include applying abrasion tape to protect the wire harness bundle free of charge (parts and labor). The time needed for this repair is less than one-half day. However, due to service scheduling requirements, your dealer may need your vehicle for a longer period of time.

***What we need you to do***
