Description of Defect:

Description of the Defect: Mercedes-Benz AG ("MBAG"), the manufacturer of Mercedes-Benz and

Freightliner vans, has determined that the Operator's Manual for certain Sprinter vehicles [platform 907 (VS30)] with automatic transmission does not correctly specify certain conditions under which the automatic parking

function ("Auto-P") operates.

FMVSS 1: NR FMVSS 2: NR

Description of the Safety Risk: The Operator's Manual describes certain functions, which would

automatically engage the park position "P" if (1) the driver opens the seat belt buckle or (2) the driver leaves the seat when the vehicle is stationary or driving at very low speed. However, this functionality is not available in the affected Sprinter vehicles. If a customer were to rely on the Auto-P function as described in the Operator's Manual, the possibility of vehicle rollaway or movement cannot be ruled out which could increase the risk of a crash.

Chronology:

In late November 2019, MBUSA reviewed a complaint from a delivery fleet customer in the US market. The

complaint indicated that the automatic parking function (Auto-P) was not functioning consistently as described in the Operator's Manual. In December 2019, MBAG launched an investigation to analyze the report from the US market. The investigation included an assessment of the fleet customer's report about the manner in which Auto-P was operating in some of its vehicles compared to the described functionality of the feature in the operating manual. MBAG closely reviewed the specific operating parameters for Auto-P when the driver's seat belt buckle was unlatched or the occupant left the driver's seat. Vehicles, which remained at the plant, were provided with an updated Owner's Manual supplement and MBAG's assessment continued. MBAG also considered whether by relying on the description of Auto-P conditions in the Owner's Manual, the operator may assume that Auto-P would engage if the vehicle is stopped or moving at a low speed and the driver unbuckles the seatbelt and exits the vehicle, but not through the driver's side door. MBAG reviewed the application of the Auto-P function and understood that it was used primarily in delivery van type vehicles where there was some potential for the driver to rely upon Auto-P in the circumstances described in the Owner's Manual. On March 18, 2020, MBAG determined that a safety risk could not be ruled out and decided to initiate a recall campaign.

6/16/2020 - Forest River is filing a pass thru recall to notify consumers. DTNA will provide all quarterly reports

Description of Remedy:

Description of Remedy Program: An authorized Mercedes-Benz or Freightliner Sprinter dealer will

supplement the Operator's Manual with a correct description of the Auto-P function, which is already in the vehicle. Pursuant to 49 C.F.R. § 577.11(e),

Daimler Vans does not plan to provide notice about pre-notice

reimbursement to owners since all involved vehicles remain covered

under the vehicle's New Vehicle Limited Warranty.

What is Mercedes Phone Number? 854-888-3374

How Remedy Component Differs An authorized Mercedes-Benz or Freightliner Sprinter dealer will

from Recalled Component: supplement the correct description of the Auto-P function to the Owner's

Manual.

Identify How/When Recall Condition Revisions to the Owner's Manual were made in December 2019 as part of

was Corrected in Production: the introduction of the new model year vehicle.

Recall Schedule:

Description of Recall Schedule: Forest River has the utmost urgency in our recalls. Forest River will send

suspected VIN numbers to our third party vendor that is licensed to pull data on the current owner of the vehicles (as needed) once a formal NHTSA I.D. is provided. Forest River intends on pushing the mailing out as soon as NHTSA provides any correction(s) and an Acknowledgement

Letter.
