**NHTSA RECALL 20V-378**

### IMPORTANT SAFETY RECALL

**THIS NOTICE APPLIES TO YOUR VEHICLE, VIN: YV9AC9HL9K9999999**

Dear Volvo Owner,

This notice is sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act.

Volvo Car USA LLC (Volvo) on behalf of Volvo Car Group, has decided that a defect which relates to motor vehicle safety exists in certain model year 2007-2018 S60 Series, V60 Series, S80 Series, XC60, XC70 and V70 vehicles.

#### The reason for Recall R10029:

Volvo Cars investigations have identified a problem regarding the front seat belt fastening, mounted on the outboard side of the front seat. The front seat belt fastening cable, may suffer from wear and fatigue if repeatedly bent over the seat cushion. This could cause damage to the cable, which could result in reduced or no seat belt restraint function, increasing the risk of injury during a crash.

Until your vehicle has been repaired, we recommend that the driver and passenger secure that the seat belt fastening is in a vertical position, aligned with the backrest (see pictures), so that it will not be bent over the seat cushion when entering the seat. This will reduce the risk of damage of the seat belt fastening.

The seat belt lower fixing buckle rests in a position that is past the bolster of the seat

During entry, this "buckle" is permitted to fold over the lower cushion repeatedly

This can be avoided by placing the seatbelt as above before entry and exit

Seatbelt folded over onto the bottom of the seat
