Dear Hino Truck Owner:

This notice is being sent to you in accordance with the requirements of the National Traffic and Motor Vehicle Safety Act. Hino has determined that a defect, which relates to motor vehicle safety, exists in certain 2021 conventional trucks. You received this notice because our records, which are based primarily on state registration and title data, indicate that you are the current owner.

What is the Condition?

In the ABS-ECU control program for the 2021MY low-profile vehicles equipped with a full air brake system, we determined that because the programmed set value of the number of teeth in the rear tone ring was different from the actual number of teeth in the rear tone ring of the vehicles, the ABS warning lamp illuminated and the ABS function became disabled.
