Issue: Individual parts of the front seat backrest adjusting mechanism and the side element of the front seat backrest frame may not have been welded properly. In the event of a rear-end crash, the backrest adjustment could break under unfavorable conditions and the intended restraint effect may no longer be achieved. This may cause an increased risk of injury to the occupant of the front seat and potentially to the occupant in the rear seat directly behind it.

- Repair:**
- REPAIR AVAILABLE – September 04, 2020 / Inspect the front driver and passenger seats. If an affected part is found, the seatback frame will be replaced.
 - See ELSA/ServiceNet for complete repair & claiming instructions
 - Check both the daily Campaign Open Inventory report and and OMD for affected vehicles in inventory. Verify OPEN status in ELSA on the day of repair.
 - Repair every affected inventory vehicle before delivery to consumers.

Parts Department:

Due to the small number of affected vehicles that will need repair, there will be no parts allocation.

IMPORTANT REMINDER: VEHICLES AFFECTED BY SAFETY & COMPLIANCE RECALLS

New Vehicles in Dealer Inventory: It is a violation of federal law for a dealer to deliver a new motor vehicle or any new or used item of motor vehicle equipment (including a tire) covered by this notification under a sale or lease until the defect or noncompliance is remedied. By law, dealers must correct, prior to delivery for sale or lease, any vehicle that fails to comply with an applicable Federal Motor Vehicle Safety Standard or that contains a defect relating to motor vehicle safety.

Pre-Owned Vehicles in Dealer Inventory: Dealers should not deliver any pre-owned vehicles in their inventory which are involved in a safety or compliance recall until the defect has been remedied.
