Visit recalls.mopar.com for more information or call the FCA US Recall Team at **1-800-853-1403.**

Details of the Recall

The Body Control Module (BCM) software on your vehicle may not meet FMVSS No. 111 which requires that the rear visibility system default to the rearview image being visible, at the beginning of each backing event, regardless of any modifications to the field of view that the driver had previously selected. Suspect vehicles are equipped with a "stealth mode" that disables the rearview image when selected and the system does not default to displaying the rearview image at the beginning of the next backing event after being engaged. The vehicle operator will notice that the rearview image is not displayed if attempting to reference the image while backing. If this warning is not heeded, backing without verifying it is safe to do so, could lead to an increased risk of injury to people outside the vehicle.

How do I schedule my **FREE** repair?

- ◆ Simply contact your Chrysler, Jeep®, Dodge or RAM dealer right away to schedule a service appointment.

We apologize for any inconvenience, but are sincerely concerned about your safety. Thank you for your attention to this important matter.
