## Description of Defect :

Description of the Defect : General Motors has decided that a defect which relates to motor vehicle safety exists in certain Continental tires installed as original equipment on certain 2020 model year Buick Enclave, Cadillac XT5, Chevrolet Traverse, and GMC Acadia, and 2020-2021 model year Chevrolet Silverado and GMC Sierra vehicles. According to the tire manufacturer, Continental Tires the Americas (CTA), the affected tires may have an overcure condition and CTA has initiated a safety recall for these tires.

FMVSS 1 : NR

FMVSS 2 : NR

Description of the Safety Risk : According to CTA, overcured tires may experience a carcass break in the sidewall with sudden air loss or could develop a belt edge separation which could lead to partial or full tread/belt loss. These conditions may increase the risk of a crash.

Description of the Cause : The affected tires were cured for a time beyond CTA's specifications.

Identification of Any Warning  
that can Occur : NR

## Involved Components :

Component Name 1 : TIRE

Component Description : Tire

Component Part Number : 84406073, 23376686, 42441705

## Supplier Identification :

### Component Manufacturer

Name : Continental Tire the Americas, LLC  
Address : 1830 Macmillan Park Drive  
Fort Mill SOUTH CAROLINA 29707  
Country : United States

## Chronology :

On September 25, 2020, Continental Tire the Americas (CTA) notified GM that certain tires supplied by CTA to GM may have had an overcure condition. The issue was reported to GM's Speak Up For Safety program on September 28, 2020. GM opened an investigation the next day.

On October 7, 2020, CTA provided additional information relating to the population of suspect tires, with the understanding that CTA was continuing to analyze its production data. On October 22, CTA informed GM that it had shipped a total of seven potentially overcured tires to GM and provided the applicable DOT and production mold number combinations for those tires. On October 27, CTA notified GM that it intended to initiate a recall for all suspect tires supplied to GM and other OEMs. GM used the identified DOT and mold numbers, its manufacturing plant records and CTA shipping data to determine the population of vehicles that may be affected.

On October 29, 2020, GM's Safety and Field Action Decision Authority decided to conduct a safety recall of vehicles that may have been equipped with the suspect tires. GM is not aware of any injuries or accidents related to this condition.

## Description of Remedy :

Description of Remedy Program :	Dealers will inspect vehicles and replace tires that have DOT number and production mold number combinations identified by Continental. Pursuant to 49 C.F.R. § 573.13(d)(1), all covered vehicles are under warranty, so reimbursement is not offered.
How Remedy Component Differs from Recalled Component :	Remedy tires will have DOT number and production mold number combinations not affected by the condition.
Identify How/When Recall Condition was Corrected in Production :	Continental implemented a series of improvements to their plant procedures related to curing time and traceability in September and October of 2020.

## Recall Schedule :

Description of Recall Schedule : Dealers will be notified on November 5, 2020. Customer notification is estimated to begin on December 21, 2020.
